将Nginx设置为Windows服务

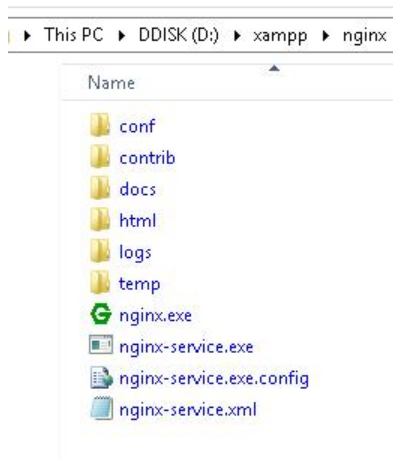

需要借助"Windows Service Wrapper"小工具，项目地址：<https://github.com/kohsuke/winsw>

下载地址：<http://repo.jenkins-ci.org/releases/com/sun/winsw/winsw/1.18/winsw-1.18-bin.exe>

下载该工具后，将其放在 Nginx安装目录下，并重命名为nginx-service.exe，创建配置文件nginx-service.xml（名字要和工具名一样），

创建nginx-service.exe.config（为支持NET 4.0 runtime，默认只支持NET 2.0 runtime）

文件结构如下：

nginx-service.xml 内容如下：

```
<pre> <service>
  <id>nginx</id>
  <name>Nginx Service</name>
  <description>High Performance Nginx Service</description>
  <logpath>D:\xampp\nginx\logs</logpath>
  <log mode=&#34;roll-by-size&#34;>
    <sizeThreshold>10240</sizeThreshold>
    <keepFiles>8</keepFiles>
  </log>
  <executable>D:\xampp\nginx\nginx.exe</executable>
  <startarguments>-p D:\xampp\nginx</startarguments>
  <stopexecutable>D:\xampp\nginx\nginx.exe</stopexecutable>
  <stoparguments>-p D:\xampp\nginx -s stop</stoparguments>
</service></pre>
```

nginx-service.exe.config 内容如下：

```
123456789
..  ....
```

在cmd中运行如下命令安装windows服务

```
<pre>D:\xampp\nginx\nginx-service.exe install</pre>
```

之后就可以在Windows服务面板中启动服务了

Network Store Interface Service	This service delivers network...	Running	Automatic	Local Service
Ngixn Service	High Performance Ngixn Ser...	Running	Automatic	Local System
Optimize drives	Helps the computer run mo...		Manual	Local System

浏览器中就可以正常访问了

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to nginx.org.
Commercial support is available at nginx.com.

Thank you for using nginx.
