今天下载更新后，一直在booting界面打转，查看了一下日志，说这个文件rsync4darwin.zip不存在
查看到只有rsync-src.zip：

I 2021/04/07 08:56:02 working.go:143: kernel booted

I 2021/04/07 14:39:00 conf.go:239: exited kernel

F 2021/04/07 15:00:22 working.go:201: unzip rsync failed: open /Applications/SiYuan.app/Contents/Resources/rsync4darwin.zip: no such file or directory

F 2021/04/07 15:11:15 working.go:201: unzip rsync failed: open /Applications/SiYuan.app/Contents/Resources/rsync4darwin.zip: no such file or directory

F 2021/04/07 15:49:06 working.go:201: unzip rsync failed: open /Applications/SiYuan.app/Contents/Resources/rsync4darwin.zip: no such file or directory

因为新注册帐号想发个贴子发不了，然后自己把rsync-src.zip改名rsync4darwin.zip自动正常登录了！
