使用 Vditor 后,Vue3 无法打包

在Vite建的Vue3，Typescript项目里，开发时，可以正常使用Vditor,一旦使用yarn build打包项目，会报错。

我专门建一个新项目，里面只添加一个Vditor的依赖，再次打包，依然失败。

这是写的代码

```
<template>
  <div id="vditor"></div>
</template>

<script lang="ts" setup>
import { onMounted } from "vue";
import Vditor from "vditor";

ref: vditor = null as null | Vditor;

onMounted(() => {
  initVditor()
})

const initVditor = () => {
  vditor = new Vditor("vditor", {
    height: 360,
    toolbarConfig: {
      pin: true,
    },
    cache: {
      enable: false,
    },
    after: () => {
      if (vditor)
        vditor.setValue('hello, Vditor + Vue!')
    }
  });
}
</script>
<style>
@import url(vditor/dist/index.css);
</style>
```

这是报错内容

```
yarn run v1.22.10
warning package.json: No license field
$ vue-tsc --noEmit && vite build
node_modules/vditor/dist/index.d.ts:1:23 - error TS2688: Cannot find type definition file for './ypes'.
