某次启动发现卡死，查看日志发现是数据库的问题。

删除 `C:\Users\<username>\AppData\Local\Temp\siyuan\siyuan.db` 后问题解决。

启动日志：

I 2021/06/09 09:01:57 working.go:99:

I 2021/06/09 09:01:57 working.go:100: kernel is booting:

- * ver [1.2.0-beta4]
- * runtime mode [prod]
- * workspace directory [C:\Users\<username>\Documents\Notes\Siyuan]
- * working directory [C:\Users\<username>\AppData\Local\Programs\SiYuan\resources]
- * temp directory [C:\Users\<username>\AppData\Local\Temp\siyuan]
- * system temp directory [C:\WINDOWS\Temp\siyuan]
- * rsync directory [C:\Users\<username>\AppData\Local\Programs\SiYuan\resources\rsync]
- * read only [false]
- * container [std]
- * resident [true]
- * arch [amd64]

I 2021/06/09 09:01:57 conf.go:209: local serve path [http://<myip>:6806]

I 2021/06/09 09:01:57 serve.go:50: kernel HTTP server is booting [http://0.0.0.0:6806]

I 2021/06/09 09:01:59 box.go:522: rebuilding database of box [Knowledge Base]

E 2021/06/09 09:01:59 database.go:858: exec database stmt [DELETE FROM attributes WHERE box = ?] failed: no such table: attributes
