knife4j增强模式自动导入openApiExtensionResolver 爆红最快解决方案

在Swagger2Configuration配置类上加上注解@EnableKnife4j完美解决

```
@Configuration
//@EnableSwagger2
@EnableKnife4j
@EnableConfigurationProperties(Knife4jProperties.class)
public class Swagger2Configuration {

    @Autowired
    private Knife4jProperties knife4jProperties;

    private final OpenApiExtensionResolver openApiExtensionResolver;

    @Autowired
    public Swagger2Configuration(OpenApiExtensionResolver openApiExtensionResolver) {
        this.openApiExtensionResolver = openApiExtensionResolver;
    }
}
```
