```

Vditor在react+ant-design项目中不显示svg bar。大概率是什么原因呢？

```

appReady.then(async () => {
  await loadOidcUser(
    (provided) => provided && store.dispatch(setUserInfo(provided))
  )
}

```

```

ReactDOM.render(
  <ReduxProvider store={store}>
    <PersistGate loading={null} persistor={persistor}>
      <ConfigProvider locale={zhCN}>
        <App />
      </ConfigProvider>
    </PersistGate>
  </ReduxProvider>,
  document.getElementById('root')
)
})

```
