<p>思源笔记开发者： </p>

<p>我在使用思源笔记过程中，出现了以下问题，目前已经可以正常使用，下面是出现问题的具体说。 </p>

<p>软件版本： macOS arm 版，具体版本号不记得了 </p>

<p>出问题的时间大约是 16:30 ~ 16:35 左右，在 16:35 以后的十分多钟里重复尝试了打开软件、重软件等操作。 </p>

在修改笔记过程中，出现了内核中断问题，此前出现内核中断只需重新连接即可，但这次内核中后点击【链接内核】的按钮，出现了卡住的情况，大约在卡住 10 秒后，我调出 macOS 的后台管理强行退出了【思源笔记.app】

在强行退出后，再次打开可以显示笔记本的列表，但无法打开打开笔记本下每个页面的内容，且法看到每个页面的标题，主屏幕出现转圈圈的现象（如下图）

<p></p>

然后我强行退出了软件，并在官网重新下载了 macOS M1 的安装包，重新安装，就打不开软件，程序坞显示软件已打开（因为下方有小圆点），但是没有思源笔记的界面。

在群友建议下，我卸载了新安装的思源笔记，然后重启 MacBook 后，再次安装最新版，解决该题。

<p>下面是【siyuan.log】文件中此次问题相关的日志内容： </p>
