Pre-purchase Questions

1. Is there documentation for guiding how to use the source code ?

Documentation and source code are included in the download package. You will get all in one.

2. Does it support backend end or connect any APIs ?

No, It doesn't. It just included a template only. We do not connect any APIs. You have to develop by yourself for matching with your biz.

3. After buying this application, can I modify color, components, remove or add some booking modules ?

Yes, you absolutely can do that

4. Can I use this application and connect with my backend or other booking site ?

Yes, you just add more function for connecting your backend/APIs

5. Does it use 3rd parties to develop UI/UX like React NativeBase, React Native Elements ?

No, It doesn't. It is using pure React Native for development. If you would like to include React NativeBase or React Native Elements You can do that.

6. Will I get the free upgrade on the next coming version ?

Yes, you will get the free upgrade with more awesome features coming, please follow the change logs to see the detail update. You will get the notified email for a new version update on stores.

Change Logs

v1.0.1 13/9/2022

1. fix darkMode some bugs.

2. Navigation bar background color adaptive.

v1.0.0 24/8/2022

First release

Please note: BookingUI is a UI suite, we do not provide back-end API, the in-app data is used or simulation demonstration, if you need to use your own product data, you still need to connect the data interface, you can contact us if you have any questions, we are happy to answer for you, including but not limited to BookingUI suite.

[Regular License](#) [Extended License](#) ****\$19****

Use, by you or one client, in a single end product which end users **are not** charged for. The total price includes the item price and a buyer fee.
