-

@SiYuan

Enhancement

- When local.json is corrupted, clear the file to avoid being unable to enter the main interface
- Support KaTex macro definition on the mobile
- Add a new API [Move block](#)
- Show "What's New in SiYuan" after upgrading
- Add version info at the end of the message in all error notifications
- Dragging the playback progress of the audio block will pull out the panel on iOS
- When swiping left and right to pull out the panel, the editor should be out of focus on the obile
- After clicking the slash menu on the mobile, modify the hidden keyboard to close the slash menu
- Custom AI action no longer inserts itself into content
- Save layout supports overwriting with the same name
- Show inline-element menu only after clicking [BIU](#) or selecting text
- AI translation adds support for [Traditional Chinese](#)
- Improve network online check of data sync
- Improve kernel HTTP panic recover

- Prompt to return to the desktop on the Android
- Clicking + behaves inconsistently on the mobile
- Move charts should not slide side panel on the mobile
- Add flashcard to recently opened documents and switcher
- Move the mobile exit app button to a more accessible location
- Monitor the search performance and suggest solutions
- Show heading block appearance style in the Outline Panel
- Enhance mobile search function

Bugfix

- Switching to export preview mode after focusing and then switching back to edit mode did not maintain focus
- Export PDF margins error after scale is not 1
- Initialization interface hangs on macOS
- A blank area will appear after clicking the toolbar and hiding the keyboard on the mobile
- Quickly closing tabs will cause a white screen in the editing area
- Window buttons overlap after spaced repetition fullscreen

Document

- Add Note and Limitations in Dock hosting chapter to user guide
- Add Performance Optimization chapter to user guide

Development

- Create separate changelog files for each release
- Add zh_CN changelog
- Move CHANGELOG.md to changelogs dir
- Attribute View map to database table
